1. What's the meaning of this sign?

A. No entry for vehicles

B. National speed limit applies

C. No waiting on the carriageway

D. Local speed limit applies

2. What's the national speed limit for cars and motorcycles on a dual carriageway?

A. 30 mph

B. 70 mph

C. 60 mph

D. 50 mph

3. There are no speed-limit signs on the road. In England, Scotland and Northern Ireland how is a 30 mph limit generally indicated?

A. By double or single yellow lines

B. By pedestrian islands

C. By street lighting

D. By hazard warning lines

4. In England, Scotland and Northern Ireland what will the speed limit usually be where you can see street lights but no speed-limit signs?

A. 60 mph

B. 50 mph

C. 40 mph

D. 30 mph

5. What does this sign mean?

A. Minimum speed 30 mph

B. End of maximum speed

C. End of minimum speed

D. Maximum speed 30 mph

6. What should you do if you want to overtake a tractor but aren't sure that it's safe?

A. Follow another vehicle as it overtakes the tractor

B. Sound your horn to make the tractor driver pull over

C. Speed past, flashing your lights at oncoming traffic

D. Stay behind it if you're in any doubt

7. Which vehicle is most likely to take an unusual course at a roundabout?

A. Estate car

B. Taxi

C. Delivery van

D. Long vehicle

8. When may you stop on a clearway?

A. Never

B. During daylight hours

C. In the rush hour

D. When it's busy

9. What's the meaning of this sign?

A. School crossing patrol

B. No entry

C. Waiting restrictions

D. National speed limit

10. You're looking for somewhere to park at night. When may you park on the right-hand side of the road?

A. When you're more than 10 metres (32 feet) from a junction

B. When you're in a one-way street

C. When you have your sidelights on

D. When you're under a lamppost

11. When should you use the right-hand lane of a three-lane dual carriageway?

A. When you're using cruise control

B. When you're overtaking only

C. When you're overtaking or turning right

D. When you're turning right only

12. You're approaching a busy junction. What should you do when, at the last moment, you realise you're in the wrong lane?

A. Stop until the area has cleared

B. Continue in that lane

C. Force your way into the lane you need

D. Use arm signals to help you change lane

13. Where may you overtake on a one-way street?

A. On either the right or the left

B. Only on the left-hand side

C. Overtaking isn't allowed

D. Only on the right-hand side

14. What signal should you give when you're going straight ahead at a roundabout?

A. Signal left when you're approaching the roundabout

B. Signal right when you're approaching the roundabout

C. Don't signal at any time

D. Signal left before leaving the roundabout

15. Which vehicle might have to take a different course from normal at a roundabout?

A. Long vehicle

B. Sports car

C. Van

D. Estate car

16. When may you enter a box junction?

A. When traffic signs direct you

B. When there are fewer than two vehicles ahead

C. When signalled by another road user

D. When your exit road is clear

17. When may you stop and wait in a box junction?

A. When you're in a queue of traffic going ahead

B. When oncoming traffic prevents you from turning right

C. When you're in a queue of traffic turning left

D. When you're on a roundabout

18. Who is authorised to signal you to stop?

A. A police officer

B. A motorcyclist

C. A pedestrian

D. A bus driver

19. What should you do if you see a pedestrian waiting at a zebra crossing?

A. Go on quickly before they step onto the crossing

B. Ignore them as they're still on the pavement

C. Be ready to slow down or stop to let them cross

D. Stop before you reach the zigzag lines and let them cross

20. Which road users benefit from toucan crossings?

A. Car drivers and motorcyclists

B. Tram and train drivers

C. Bus and lorry drivers

D. Cyclists and pedestrians

21. You’re waiting at a pelican crossing. What does it mean when the red light changes to flashing amber?

A. Get ready and go when the continuous amber light shows

B. Give way to pedestrians on the crossing

C. Move off immediately without any hesitation

D. Wait for the green light before moving off

22. You see these double white lines along the centre of the road. When may you park on the left?

A. If the line nearest to you is broken

B. When there are no yellow lines

C. To pick up or set down passengers

D. During daylight hours only

23. You're turning right at a crossroads. An oncoming driver is also turning right. What's the advantage of turning behind the oncoming vehicle?

A. You'll have a clearer view of any approaching traffic

B. You'll use less fuel because you can stay in a higher gear

C. You'll have more time to turn

D. You'll be able to turn without stopping

24. You're travelling along a residential street. There are parked vehicles on the left-hand side. Why should you keep your speed down?

A. So that oncoming traffic can see you more clearly

B. There may be delivery lorries on the street

C. Children may run out from between the vehicles

D. You may set off car alarms

25. What should you do when there's an obstruction on your side of the road?

A. Carry on, as you have priority

B. Give way to oncoming traffic

C. Wave oncoming vehicles through

D. Accelerate to get past first

26. When would you use the right-hand lane of a two-lane dual carriageway?

A. When you're travelling at a constant high speed

B. When you're turning right or overtaking

C. When you're passing a side road on the left

D. When you're staying at the minimum allowed speed

27. Who has priority at an unmarked crossroads?

A. The faster vehicle

B. The larger vehicle

C. No-one has priority

D. The smaller vehicle

28. What's the nearest you may park to a junction?

A. 15 metres (49 feet)

B. 10 metres (32 feet)

C. 12 metres (39 feet)

D. 20 metres (66 feet)

29. You're looking for somewhere to safely park your vehicle. Where would you choose to park?

A. Near the brow of a hill

B. At or near a bus stop

C. In a designated parking space

D. On the approach to a level crossing

30. You're waiting at a level crossing. What must you do if a train passes but the lights keep flashing?

A. Edge over the stop line and look for trains

B. Carry on waiting

C. Phone the signal operator

D. Park and investigate

31. What does this sign mean?

A. Free-parking zone ends

B. No through road

C. End of traffic-calming zone

D. End of controlled parking zone

32. What must you do if you come across roadworks that have a temporary speed limit displayed?

A. Ignore the displayed limit

B. Obey the speed limit

C. Obey the limit, but only during rush hour

D. Use your own judgement; the limit is only advisory

33. You're in a built-up area at night and the road is well lit. Why should you use dipped headlights?

A. So that you can switch to main beam quickly

B. So that you can see further along the road

C. So that you can go at a much faster speed

D. So that you can be easily seen by others

34. You're turning right onto a dual carriageway. What should you do if the central reservation is too narrow to contain your vehicle?

A. Wait until the road is clear in both directions

B. Proceed to the central reservation and wait

C. Stop in the first lane so that other vehicles give way

D. Emerge slightly to show your intentions

35. What's the national speed limit on a single carriageway road for cars and motorcycles?

A. 70 mph

B. 30 mph

C. 50 mph

D. 60 mph

36. What should you do when you park at night on a road that has a 40 mph speed limit?

A. Leave dipped headlights switched on

B. Park facing the traffic

C. Leave parking lights switched on

D. Park near a street light

37. Where will you see these red and white markers?

A. Approaching a concealed speed-limit sign

B. Approaching the end of a motorway

C. Approaching a concealed level crossing

D. Approaching the end of a dual carriageway

38. You're travelling on a motorway in England. When must you stop your vehicle?

A. When signalled to stop by a pedestrian on the hard shoulder

B. When signalled to stop by a roadworks supervisor

C. When signalled to stop by a traffic officer

D. When signalled to stop by a driver who has broken down

39. How should you signal if you're going straight ahead at a roundabout?

A. Signal right on the approach to the roundabout and keep the signal on

B. Signal right on the approach and then left to leave the roundabout

C. Signal left after you leave the roundabout and enter the new road

D. Signal left just after you pass the exit before the one you're going to take

40. When may you drive over a pavement?

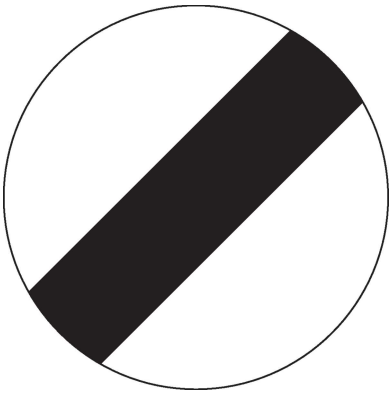

A. If there are no pedestrians nearby

B. To overtake slow-moving traffic

C. When the pavement is very wide

D. To gain access to a property

41. A single carriageway road has this sign. What's the maximum permitted speed for a car towing a trailer?

A. 50 mph

B. 30 mph

C. 40 mph

D. 60 mph

42. What's the speed limit for a car towing a caravan on a dual carriageway?

A. 40 mph

B. 50 mph

C. 60 mph

D. 70 mph

43. You want to park and you see this sign. What should you do on the days and times shown?

A. Park in a bay and pay

B. Park on yellow lines and not pay

C. Park on yellow lines and pay

D. Park in a bay and not pay

44. A cycle lane, marked by a solid white line, is in operation. What does this mean for car drivers?

A. They may park in the lane

B. They may drive in the lane at any time

C. They mustn't drive along the lane

D. They may use the lane when necessary

45. You're going to turn left from a main road into a minor road. What should you do as you approach the junction?

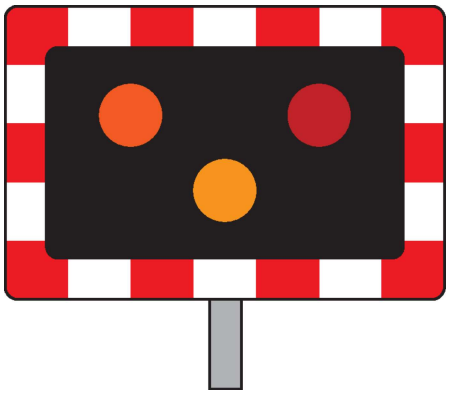

A. Keep in the middle of the road

B. Keep well to the left of the road

C. Swing out to the right just before turning

D. Keep just left of the middle of the road

46. You're waiting at a level crossing. What should you do if the red warning lights continue to flash after a train has passed by?

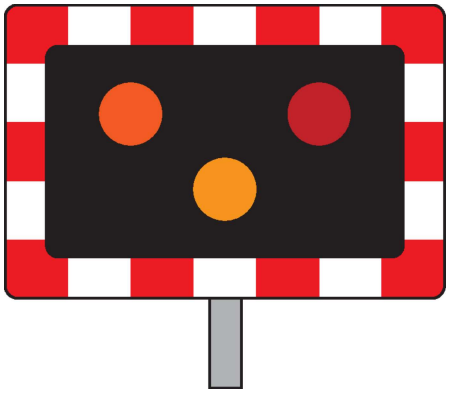

A. Drive across carefully

B. Get out and investigate

C. Telephone the signal operator

D. Continue to wait

47. What should you do if the amber lights come on and a warning sounds while you're driving over a level crossing?

A. Keep going and clear the crossing

B. Get everyone out of the vehicle immediately

C. Stop and reverse back to clear the crossing

D. Stop immediately and use your hazard warning lights

48. You're driving on a busy main road. What should you do if you find that you're driving in the wrong direction?

A. Turn into a side road on the right and reverse into the main road

B. Make a U-turn in the main road

C. Make a ‘three-point’ turn in the main road

D. Turn around in a side road

49. When may you drive without wearing your seat belt?

A. When you're carrying out a manoeuvre that includes reversing

B. When you're moving off on a hill

C. When you're testing your brakes

D. When you're driving slowly in queuing traffic

50. How far are you allowed to reverse?

A. No more than a car’s length

B. The length of a residential street

C. As far as it takes to reverse around a corner

D. No further than is necessary

51. What should you do when you're unsure whether it's safe to reverse your vehicle?

A. Sound your horn

B. Reverse slowly

C. Get out and check

D. Rev your engine

52. Why could it be dangerous to reverse from a side road into a main road?

A. Your reverse sensors will beep

B. Your mirrors will need adjusting

C. Your reversing lights will be hidden

D. Your view will be restricted

53. You want to turn right at a box junction. What should you do if there's oncoming traffic?

A. Drive slowly into the box junction when signalled by oncoming traffic

B. Wait in the box junction if your exit is clear

C. Wait before the junction until it's clear of all traffic

D. Drive on; you can't turn right at a box junction

54. You're reversing into a side road. When would your vehicle be the greatest hazard to passing traffic?

A. After you've completed the manoeuvre

B. When the front of your vehicle swings out

C. After you've entered the side road

D. Just before you begin to manoeuvre

55. Where's the safest place to park your vehicle at night?

A. In a garage

B. In a quiet car park

C. On a busy road

D. Near a red route

56. When may you stop on an urban clearway?

A. To load or unload goods

B. To ask for directions

C. To use a mobile telephone

D. To set down and pick up passengers

57. You're looking for somewhere to park your vehicle. Neither you or your passenger are disabled. What should you do if the only free spaces are marked for disabled drivers?

A. Use one of these spaces

B. Wait for a regular parking space to become free

C. Use one of the spaces as long as one is kept free

D. Park in one of these spaces but stay with your vehicle

58. You're on a road that's only wide enough for one vehicle. What should you do if a car is coming towards you?

A. Pull into a passing place on your right

B. Pull into a passing place on your left

C. Pull into a passing place if your vehicle is wider

D. Force the other driver to reverse

59. You're driving at night with your headlights on main beam. A vehicle is overtaking you. When should you dip your headlights?

A. Some time after the vehicle has passed you

B. As soon as the vehicle passes you

C. Only if the other driver dips their headlights

D. Before the vehicle starts to pass you

60. When may you drive a car in this bus lane?

A. To get to the front of a traffic queue

B. To overtake slow-moving traffic

C. You may not use it at any time

D. Outside its hours of operation

61. Other than direction indicators, how can you give signals to other road users?

A. By using interior lights

B. By using sidelights

C. By using fog lights

D. By using brake lights

62. You're parked in a busy high street. What's the safest way to turn your vehicle around so you can drive in the opposite direction?

A. Carry out a U-turn

B. Turn around in a quiet side road

C. Drive into a side road and reverse out into the main road

D. Ask someone to stop the traffic

63. Where should you park your vehicle at night?

A. Near a police station

B. In a well-lit area

C. On a red route

D. In a quiet road

64. You're driving in the right-hand lane of a dual carriageway. What should you do if you see a sign showing that the right-hand lane is closed 800 yards ahead?

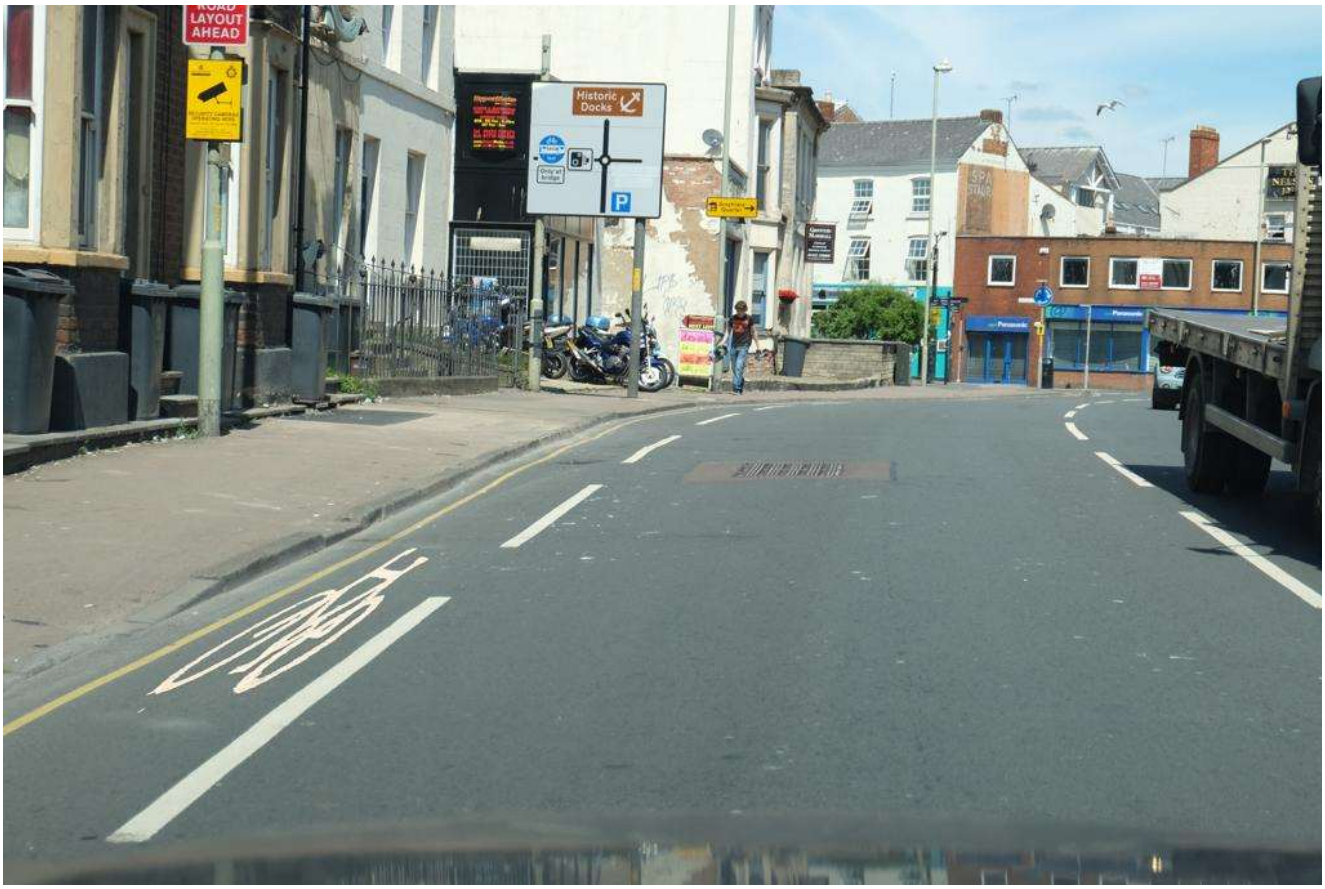

A. Wait and see which lane is moving faster

B. Keep in that lane until you reach the queue

C. Move to the left immediately

D. Move to the left in good time

65. You're driving on a road that has a cycle lane. What does it mean if the lane is marked by a broken white line?

A. You shouldn't drive in the lane unless it's unavoidable

B. The lane must be used by motorcyclists in heavy traffic

C. Cyclists can travel in both directions in that lane

D. There's a reduced speed limit for motor vehicles using the lane

66. When are you allowed to park in a parking bay for disabled drivers?

A. When you have an adapted vehicle

B. When you have a Blue Badge

C. When you have a wheelchair

D. When you have an advanced driver certificate

67. When must you stop your vehicle?

A. If you’re involved in an incident that causes damage or injury

B. At a junction where there are ‘give way’ lines

C. At the end of a one-way street

D. Before merging onto a motorway

Answers

1. B - National speed limit applies

This sign doesn't tell you the speed limit in figures. You should know the speed limit for the type of road that you're on and the type of vehicle that you're driving or riding. Study your copy of The Highway Code.

2. B - 70 mph

Make sure that you know the speed limit for the road that you're on. The speed limit on a dual carriageway or motorway is 70 mph for cars and motorcycles, unless signs indicate otherwise. The speed limits for different types of vehicle are listed in The Highway Code.

3. C - By street lighting

In England, Scotland and Northern Ireland, there's a 30 mph speed limit where there are street lights unless signs show another limit. In Wales street lights indicate the limit is 20 mph unless signs show otherwise.

4. D - 30 mph

In England, Scotland and Northern Ireland the presence of street lights generally indicates that there's a 30 mph speed limit, unless signs tell you otherwise. In Wales street lights indicate a 20 mph limit unless signs show otherwise.

5. C - End of minimum speed

The red slash through the sign indicates that the restriction has ended. In this case, the restriction was a minimum speed limit of 30 mph.

6. D - Stay behind it if you're in any doubt

Following a tractor can be frustrating, but never overtake if you’re unsure whether it’s safe. Ask yourself: 'Can I see far enough down the road to ensure that I can complete the manoeuvre safely?' It's better to be delayed for a minute or two than to take a chance that may cause a collision.

7. D - Long vehicle

Long vehicles might have to take a slightly different position when approaching the roundabout or going around it. This is to stop the rear of the vehicle cutting in and mounting the kerb.

8. A - Never

Clearways are in place so that traffic can flow without the obstruction of parked vehicles. Just one parked vehicle can cause an obstruction for all other traffic. You mustn't stop where a clearway is in force, not even to pick up or set down passengers.

9. C - Waiting restrictions

This sign indicates that there are waiting restrictions. It's normally accompanied by details of when the restrictions are in force. Details of most signs in common use are shown in The Highway Code. For more comprehensive coverage, see Know Your Traffic Signs.

10. B - When you're in a one-way street

Red rear reflectors show up when headlights shine on them. These are useful when you're parked at night, but they'll only reflect if you park in the same direction as the traffic flow. Normally you should park on the left, but in a one-way street you may also park on the right-hand side of the road.

11. C - When you're overtaking or turning right

You should normally use the left-hand lane on any dual carriageway unless you're overtaking or turning right. When overtaking on a dual carriageway, look for vehicles ahead that are turning right. They may be slowing or stopped. You need to see them in good time so that you can take appropriate action.

12. B - Continue in that lane

There are times when road markings are obscured by queuing traffic, or you're unsure which lane to use. If, at the last moment, you find you're in the wrong lane, don’t cut across or bully other drivers to let you in. Follow the lane you’re in and find somewhere safe to turn around and rejoin your route.

13. A - On either the right or the left

You can overtake other traffic on either side when travelling in a one-way street. Make full use of your mirrors and ensure it's clear all around before you attempt to overtake. Look for signs and road markings, and use the most suitable lane for your destination.

14. D - Signal left before leaving the roundabout

When going straight ahead at a roundabout, don’t signal as you approach it. Signal left just after passing the exit before the one you wish to take.

15. A - Long vehicle

A long vehicle may have to straddle lanes either on or approaching a roundabout so that the rear wheels don’t mount the kerb. If you’re following a long vehicle, stay well back and give it plenty of room.

16. D - When your exit road is clear

Yellow box junctions are marked on the road to prevent the road becoming blocked. Don’t enter the box unless your exit road is clear. You may wait in the box if you want to turn right and your exit road is clear but oncoming traffic or other vehicles waiting to turn right are preventing you from making the turn.

17. B - When oncoming traffic prevents you from turning right

The purpose of yellow box markings is to keep junctions clear of queuing traffic. You may only wait in the marked area when you’re turning right and your exit lane is clear but you can’t complete the turn because of oncoming traffic or other traffic waiting to turn right.

18. A - A police officer

You must obey signals to stop given by police and traffic officers, traffic wardens and school crossing patrols. Failure to do so is an offence and could lead to prosecution.

19. C - Be ready to slow down or stop to let them cross

By standing on the pavement, the pedestrian is showing an intention to cross. By looking well ahead, you'll give yourself time to see the pedestrian, check your mirrors and respond safely.

20. D - Cyclists and pedestrians

Toucan crossings are similar to pelican crossings but there's no flashing amber phase. Cyclists share the crossing with pedestrians and are allowed to cycle across when the green cycle symbol is shown.

21. B - Give way to pedestrians on the crossing

This light allows pedestrians already on the crossing to get to the other side in their own time, without being rushed. Don’t rev your engine or start to move off while they’re still crossing.

22. C - To pick up or set down passengers

You mustn't park or stop on a road marked with double white lines (even where one of the lines is broken) except to pick up or set down passengers.

23. A - You'll have a clearer view of any approaching traffic

When turning right at a crossroads where oncoming traffic is also turning right, it's generally safer to turn behind the approaching vehicle. This allows you a clear view of approaching traffic and is called 'turning offside to offside'. However, some junctions, usually controlled by traffic-light filters - are marked for vehicles to turn nearside to nearside.

24. C - Children may run out from between the vehicles

Travel slowly and carefully near parked vehicles. Beware of • vehicles pulling out, especially bicycles and motorcycles • pedestrians, especially children, who may run out from between cars • drivers opening their doors.

25. B - Give way to oncoming traffic

Take care if you have to pass an obstruction, such as a parked vehicle, on your side of the road. Give way to oncoming traffic if there isn’t enough room for you both to continue safely.

26. B - When you're turning right or overtaking

Normally you should travel in the left-hand lane and only use the right-hand lane for overtaking or turning right. Move back into the left lane as soon as it’s safe but don’t cut in across the path of the vehicle you’ve just passed.

27. C - No-one has priority

Practise good observation in all directions before you emerge or make a turn. Proceed only when you're sure it's safe to do so.

28. B - 10 metres (32 feet)

Don't park within 10 metres (32 feet) of a junction (unless in an authorised parking place). This is to allow drivers emerging from, or turning into, the junction a clear view of the road they're joining. It also allows them to see hazards such as pedestrians or cyclists at the junction.

29. C - In a designated parking space

It may be tempting to park where you shouldn’t while you run a quick errand. Careless parking is a selfish act and could endanger other road users.

30. B - Carry on waiting

If the lights at a level crossing keep flashing after a train has passed, you should continue to wait, because another train might be coming. Time seems to pass slowly when you’re held up in a queue. Be patient and wait until the lights stop flashing.

31. D - End of controlled parking zone

This sign shows that you're leaving a controlled parking zone and those restrictions no longer apply.

32. B - Obey the speed limit

Where there are extra hazards, such as at roadworks, it’s often necessary to slow traffic by imposing a lower speed limit. These speed limits aren’t advisory; they must be obeyed.

33. D - So that you can be easily seen by others

You may be difficult to see when you’re travelling at night, even on a well-lit road. If you use dipped headlights rather than sidelights, other road users should be able to see you more easily.

34. A - Wait until the road is clear in both directions

When the central reservation is narrow, it may not be able to contain your vehicle. In this case, you should treat a dual carriageway as one road. Wait until the road is clear in both directions before emerging to turn right. If you try to treat it as two separate roads and wait in the middle, your vehicle will stick out and cause an obstruction that may lead to a collision.

35. D - 60 mph

Exceeding the speed limit is dangerous and can result in you receiving penalty points on your licence. It isn't worth it. You should know the speed limit for the road that you're on by observing the road signs. Different speed limits apply if you're towing a trailer.

36. C - Leave parking lights switched on

You must use parking lights when parking at night on a road or in a lay-by on a road with a speed limit greater than 30 mph. You must also park in the direction of the traffic flow and not close to a junction.

37. C - Approaching a concealed level crossing

If there's a bend just before a level crossing, you may not be able to see the level-crossing barriers or waiting traffic. These signs give you an early warning that you may find these hazards just around the bend.

38. C - When signalled to stop by a traffic officer

You'll find traffic officers on motorways and some primary routes in England and Wales. They work in partnership with the police, helping to keep traffic moving and helping to make your journey as safe as possible. It's an offence not to comply with the directions given by a traffic officer.

39. D - Signal left just after you pass the exit before the one you're going to take

To go straight ahead at a roundabout, you should normally approach in the left-hand lane, but check the road markings. At some roundabouts, the left lane on approach is marked ‘left turn only’, so make sure you use the correct lane to go ahead. You won't normally need to signal as you approach, but signal before you leave the roundabout, as other road users need to know your intentions.

40. D - To gain access to a property

It's illegal to drive on or over a pavement, except to gain access to a property. If you need to cross a pavement, give priority to pedestrians.

41. A - 50 mph

When you're towing a trailer, a reduced speed limit also applies on dual carriageways and motorways. These lower speed limits apply to vehicles pulling all sorts of trailers, including caravans and horse boxes.

42. C - 60 mph

The speed limit for cars towing caravans or trailers on dual carriageways or motorways is 60 mph. Due to the increased weight and size of the combination, you should plan further ahead. Take care in windy weather, as a strong side wind can make a caravan or large trailer unstable.

43. A - Park in a bay and pay

Parking restrictions apply in a variety of places and situations. Make sure you know the rules and understand where and when restrictions apply. Controlled parking areas will be indicated by signs and road markings. Parking in the wrong place could cause an obstruction and danger to other traffic. It can also result in a fine.

44. C - They mustn't drive along the lane

While it's in operation, other vehicles must not use this part of the carriageway except to pick up or set down passengers. At other times, when the lane isn't in operation, you should still be aware that there may be cyclists using the lane. Give them plenty of room as you pass and allow for their movement from side to side, especially in windy weather or on a bumpy road.

45. B - Keep well to the left of the road

Your road position can help other road users to anticipate your actions. Keep to the left as you approach a left turn and don't swing out into the centre of the road in order to make the turn easier. This could endanger oncoming traffic and may cause other road users to misunderstand your intentions.

46. D - Continue to wait

At a level crossing, flashing red lights mean you must stop. If the train passes but the lights keep flashing, wait. Another train may be coming.

47. A - Keep going and clear the crossing

Keep going; don’t stop on the crossing. If the warning sounds and the amber lights come on as you’re approaching the crossing, you must stop unless it's unsafe to do so. Red flashing lights together with the audible warning mean you must stop.

48. D - Turn around in a side road

Don’t turn around in a busy street or reverse from a side road into a main road. Find a quiet side road and choose a place to turn around where you won’t obstruct an entrance or exit. Look out for pedestrians and cyclists as well as other traffic.

49. A - When you're carrying out a manoeuvre that includes reversing

You may remove your seat belt while you're carrying out a manoeuvre that includes reversing. However, you must remember to put it back on again before you resume driving.

50. D - No further than is necessary

You mustn't reverse further than is necessary. You may decide to turn your vehicle around by reversing into an opening or side road. When you reverse, always look all around you and watch for pedestrians. Don’t reverse from a side road into a main road.

51. C - Get out and check

A small child could be hidden directly behind you, so, if you can't see all around your vehicle, get out and have a look. You could also ask someone reliable outside the vehicle to guide you.

52. D - Your view will be restricted

Don’t reverse into a main road from a side road because your view will be restricted. The main road is likely to be busy and the traffic on it moving quickly.

53. B - Wait in the box junction if your exit is clear

You can wait in the box junction as long as your exit is clear. At some point there'll be a gap in the oncoming traffic, or the traffic lights will change, allowing you to proceed.

54. B - When the front of your vehicle swings out

Always check in all directions before reversing. Keep a good lookout throughout the manoeuvre and remember that the front will swing out as you reverse into the side road. Act on what you see and wait if necessary.

55. A - In a garage

If you have a garage, use it. Your vehicle is less likely to be a victim of car crime if it's in a garage. Also, in winter, the windows will be kept free from ice and snow.

56. D - To set down and pick up passengers

Urban clearways have their times of operation clearly signed. You may only stop to pick up or set down passengers.

57. B - Wait for a regular parking space to become free

It's illegal to park in a space reserved for disabled drivers unless you're permitted to do so. These spaces are provided for people with limited mobility, who may need extra space to get in and out of their vehicle.

58. B - Pull into a passing place on your left

Pull into the nearest passing place on the left if you meet another vehicle on a narrow road. If the nearest passing place is on the right, wait opposite it.

59. B - As soon as the vehicle passes you

On main beam, your lights could dazzle the driver in front. Dip your headlights as soon as the driver passes you and drop back so that the dipped beam falls short of the vehicle in front.

60. D - Outside its hours of operation

Some bus lanes operate only during peak hours and other vehicles may use them outside these hours. Make sure you check the sign for the hours of operation before driving in a bus lane.

61. D - By using brake lights

Your brake lights will give an indication to traffic behind that you're slowing down. Good anticipation will allow you time to check your mirrors before slowing.

62. B - Turn around in a quiet side road

Make sure you carry out the manoeuvre without causing a hazard to other vehicles. Choose a place to turn that's safe and considers other road users.

63. B - In a well-lit area

When you're parking at night, park in a well-lit area. This can help deter criminals from targeting your vehicle.

64. D - Move to the left in good time

Keep a lookout for traffic signs. If you’re directed to change lanes, do so in good time. Don’t • push your way into traffic in another lane • try to gain advantage by delaying changing lanes.

65. A - You shouldn't drive in the lane unless it's unavoidable

Cycle lanes are marked with either a solid or a broken white line. If the line is solid, you should check the times of operation shown on the signs, and not drive or park in the lane during those times. If the line is broken, you shouldn't drive or park in the lane unless it's unavoidable.

66. B - When you have a Blue Badge

Don’t park in a space reserved for disabled people unless you or your passenger are a Blue Badge holder. The badge must be displayed on the dashboard or fascia panel, where it can be clearly read through the front windscreen.

67. A - If you’re involved in an incident that causes damage or injury

You must stop your vehicle when signalled to do so by a • police, DVSA or traffic officer • traffic warden • school crossing patrol • red traffic light. You must also stop if you're involved in an incident that causes damage or injury to any other person, vehicle, animal or property.
