1. You're riding behind a long vehicle as it approaches a mini-roundabout. What should you do if the vehicle is signalling left, but is positioned to the right?

A. Sound your horn

B. Flash your headlights

C. Keep well back

D. Overtake on the left

2. Why should you be careful when you're riding on roads where trams also operate?

A. Trams can't steer to avoid you

B. Trams can brake very quickly

C. Trams are noisy and slow

D. Trams give off harmful exhaust fumes

3. You're about to overtake a slow-moving motorcyclist. Which sign would make you take special care?

A.

B.

C.

D.

4. You're waiting to turn right out of a minor road. It's clear to the left but a lorry is coming from the right. Why should you wait, even if you have enough time to turn?

A. The load on the lorry might be unstable

B. The lorry might be slowing down

C. The lorry could suddenly speed up

D. Anything overtaking the lorry will be hidden from view

5. You're following a long vehicle as it approaches a crossroads. What should you do if it signals left but moves out to the right?

A. Assume the signal is wrong and that it's turning right

B. Get closer in order to pass it quickly

C. Stay well back and give it room

D. Overtake it as it starts to slow down

6. You're following a long vehicle approaching a crossroads. What should you do if the driver signals right but moves close to the left-hand kerb?

A. Warn the driver about the wrong signal

B. Wait behind the long vehicle

C. Report the driver to the police

D. Overtake on the right-hand side

7. You’re approaching a mini-roundabout. What should you do if a long vehicle in front signals left but positions over to the right?

A. Keep well back

B. Sound your horn

C. Overtake on the left

D. Follow the same course as the lorry

8. You're driving on a single carriageway road. Why should you keep well back while you're following a large vehicle?

A. To give yourself acceleration space if you decide to overtake

B. To get the best view of the road ahead

C. To leave a gap in case the vehicle stops and rolls back

D. To offer other drivers a safe gap if they want to overtake you

9. You're travelling behind a bus. What should you do if it pulls up at a bus stop?

A. Accelerate past the bus

B. Look for pedestrians

C. Sound your horn

D. Pull in closely behind the bus

10. You're following a lorry on a wet road. What should you do when spray makes it difficult to see the road ahead?

A. Drop back until you can see better

B. Put your headlights on full beam

C. Keep close to the lorry, away from the spray

D. Speed up and overtake quickly

11. You're leaving a safe gap as you follow a large vehicle. What should you do if a car moves into this gap?

A. Start to overtake

B. Drop back further

C. Sound your horn

D. Flash your headlights

12. What should you do when you're approaching a bus that's signalling to move away from a bus stop?

A. Get past before it moves

B. Allow it to pull away, if it's safe to do so

C. Flash your headlights as you approach

D. Signal left and wave the bus on

13. What should you do if you want to overtake a long, slow-moving vehicle on a busy road?

A. Follow it closely and keep moving out to see the road ahead

B. Keep well back so that you get a good view of the road ahead

C. Stay behind until the driver waves you past

D. Flash your headlights for the oncoming traffic to give way

14. Which vehicles are least likely to be affected by side wind?

A. Motorcyclists

B. Cars

C. High-sided vehicles

D. Cyclists

15. What should you do as you approach this lorry?

A. Move to the right-hand side of the road

B. Slow down and be prepared to wait

C. Make the lorry wait for you

D. Flash your lights at the lorry

16. You're following a large vehicle as it approaches a crossroads. What should you do if the driver signals to turn left?

A. Overtake if you can leave plenty of room

B. Overtake if there are no oncoming vehicles

C. Wait for the driver to cancel their signal

D. Wait for the vehicle to finish turning

17. Why is it more difficult to overtake a large vehicle than a car?

A. It will take longer to overtake a large vehicle

B. A large vehicle will be fitted with a speed limiter

C. A large vehicle will have air brakes

D. It will take longer for a large vehicle to accelerate

Answers

1. C - Keep well back

Long vehicles need more room than other vehicles to turn at junctions. The driver may take up a position that seems strange, but they have to do this to ensure their rear wheels don't mount the kerb as they turn. Don’t overtake on the left – the driver won't expect you to be there and may not see you. Staying well back will also give you a better view ahead.

2. A - Trams can't steer to avoid you

Trams run on rails and can't deviate from the tracks. Keep a lookout for trams, as they move very quietly and you may not notice them approaching. Be particularly careful of the rails – they can be very slippery, especially when they're wet.

3. A -

In windy weather, watch out for motorcyclists and also cyclists, as they can be blown sideways into your path. When you pass them, leave plenty of room and check their position in your mirror before pulling back in.

4. D - Anything overtaking the lorry will be hidden from view

Large vehicles can hide other vehicles that are overtaking – especially motorcycles. You need to be aware of the possibility of hidden vehicles and not assume that it's safe to turn.

5. C - Stay well back and give it room

A long vehicle may need to swing out in the opposite direction as it approaches a turn, to allow the rear wheels to clear the kerb. Don’t try to filter through if you see a gap; as the lorry turns, the gap will close.

6. B - Wait behind the long vehicle

When a long vehicle is going to turn right, it may need to keep close to the left-hand kerb. This is to prevent the rear end of the trailer cutting the corner. You need to be aware of how long vehicles behave in such situations. Don’t overtake the lorry, because it could turn as you’re alongside. Stay behind and wait for it to turn.

7. A - Keep well back

At mini-roundabouts, there isn’t much room for a long vehicle to manoeuvre. It will have to swing out wide so that it can complete the turn safely. Keep well back and don’t try to move up alongside it.

8. B - To get the best view of the road ahead

When following a large vehicle, keep well back. If you’re too close, you won’t be able to see the road ahead and the driver of the long vehicle might not be able to see you in their mirrors.

9. B - Look for pedestrians

People may be running to catch the bus or passengers leaving the bus might wish to cross the road in front of the bus. Look out for them if you intend to go past it. Consider how many people are waiting to get on the bus – check the queue if you can. The bus might move off straight away if no-one is waiting to get on. If a bus is signalling to pull out, give it priority if it’s safe to do so.

10. A - Drop back until you can see better

Large vehicles can throw up a lot of spray when it's wet. This makes it difficult for drivers behind to see the road ahead. You'll be able to see more by dropping back further, out of the spray. This will also increase your separation distance, giving you more room to stop if you have to.

11. B - Drop back further

Sometimes your separation distance is shortened by a driver moving into the gap you've allowed. When this happens, react positively, stay calm and drop further back to re-establish a safe following distance.

12. B - Allow it to pull away, if it's safe to do so

Try to give way to buses if you can do so safely, especially when the driver signals to pull away from a bus stop. Look out for people getting off the bus or running to catch it, because they may cross the road without looking. Don’t accelerate to get past the bus, and don't flash your lights, as this could mislead other road users.

13. B - Keep well back so that you get a good view of the road ahead

When you're following a long vehicle, stay well back so that you can get a better view of the road ahead. The closer you get, the less you'll be able to see of the road. Be patient and don't take a gamble. Only overtake when you're certain that you can complete the manoeuvre safely.

14. B - Cars

Although cars are the least likely to be affected, side winds can take anyone by surprise. This is most likely to happen after overtaking a large vehicle, when passing gaps between hedges or buildings, and on exposed sections of road.

15. B - Slow down and be prepared to wait

When turning, long vehicles need much more room on the road than other vehicles. At junctions, they may take up the whole of the road space, so be patient and allow them the room they need.

16. D - Wait for the vehicle to finish turning

Hold back and wait until the vehicle has turned before proceeding. Don't overtake, because the vehicle turning left could hide another vehicle emerging from the same junction.

17. A - It will take longer to overtake a large vehicle

Depending on relative speed, it will usually take you longer to pass a lorry than other vehicles. Hazards to watch for include oncoming traffic, junctions ahead, bends or dips that could restrict your view, and signs or road markings that prohibit overtaking. Make sure you can see that it’s safe to complete the manoeuvre before you start to overtake.
