1. You're riding slowly in a town centre. Why should you glance over your left shoulder before turning left?

A. To check for cyclists

B. To help keep your balance

C. To look for traffic signs

D. To check for potholes

2. Which lane must not be used by a motorcyclist?

A. Acceleration lane

B. Tram lane

C. Overtaking lane

D. Crawler lane

3. What does this sign mean?

A. Parking for solo motorcycles

B. Passing place for motorcycles

C. Police motorcycles only

D. No parking for solo motorcycles

4. You're riding on a busy dual carriageway. What should you do before you change lanes?

A. Rely totally on your mirrors

B. Signal so that others will give way

C. Always increase your speed

D. Use mirrors and shoulder checks

5. You're looking for somewhere to park your motorcycle. Neither you or your passenger are disabled. What should you do if the area is full, except for spaces marked ‘disabled use’?

A. Park in one of these spaces but stay with your motorcycle

B. Wait for a regular parking space to become free

C. Use one of the spaces as long as one is kept free

D. Use one of these spaces because elsewhere is full

6. You're on a narrow road with passing places. What should you do if a car is coming towards you?

A. Pull into a passing place on your left

B. Turn round and ride back to the main road

C. Force the other driver to reverse

D. Pull into a passing place on your right

7. You're turning right at this crossroads. The oncoming driver is also turning right. Why is it safer to turn behind the car?

A. So you can make oncoming vehicles stop

B. So you can keep clear of following traffic

C. So you can keep close to the kerb

D. So you can see approaching traffic

8. What should you do when you're filtering through slow-moving or stationary traffic?

A. Stand up on the footrests for a good view ahead

B. Watch for vehicles emerging from side roads

C. Continually use your horn as a warning

D. Ride with your hazard warning lights on

9. You're riding towards roadworks where temporary traffic lights are on red. What should you do if the road ahead is clear?

A. Wait for the green light

B. Carry on if approaching cars have stopped

C. Ride on at normal speed

D. Ride on with extreme caution

10. What should you fit to your motorcycle if you're going abroad and you'll be riding on the right-hand side of the road?

A. Tinted red indicator lenses

B. Tinted yellow brake lights

C. Headlight deflectors

D. Twin headlights

11. What's the minimum engine size required to tow a trailer with your motorcycle?

A. 1000 cc

B. 525 cc

C. 125 cc

D. 50 cc

12. What's the national speed limit on a single carriageway?

A. 40 mph

B. 70 mph

C. 60 mph

D. 50 mph

13. When must you stop your motorcycle?

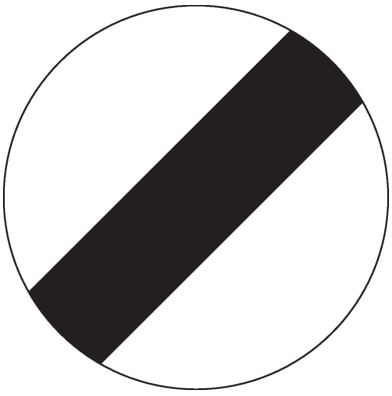

A. At a clear pelican crossing when the amber light is flashing

B. At an empty zebra crossing

C. At a junction with double broken white lines

D. When signalled to do so by a police officer

14. What's the meaning of this sign?

A. National speed limit applies

B. Local speed limit applies

C. No waiting on the carriageway

D. No entry for vehicles

15. What's the national speed limit for cars and motorcycles on a dual carriageway?

A. 30 mph

B. 70 mph

C. 60 mph

D. 50 mph

16. There are no speed-limit signs on the road. In England, Scotland and Northern Ireland how is a 30 mph limit generally indicated?

A. By hazard warning lines

B. By street lighting

C. By pedestrian islands

D. By double or single yellow lines

17. In England, Scotland and Northern Ireland what will the speed limit usually be where you can see street lights but no speed-limit signs?

A. 60 mph

B. 30 mph

C. 40 mph

D. 50 mph

18. What does this sign mean?

A. Maximum speed 30 mph

B. Minimum speed 30 mph

C. End of maximum speed

D. End of minimum speed

19. What should you do if you want to overtake a tractor but aren't sure that it's safe?

A. Stay behind it if you're in any doubt

B. Follow another vehicle as it overtakes the tractor

C. Sound your horn to make the tractor driver pull over

D. Speed past, flashing your lights at oncoming traffic

20. Which vehicle is most likely to take an unusual course at a roundabout?

A. Delivery van

B. Estate car

C. Taxi

D. Long vehicle

21. When may you stop on a clearway?

A. In the rush hour

B. Never

C. When it's busy

D. During daylight hours

22. What's the meaning of this sign?

A. Waiting restrictions

B. School crossing patrol

C. National speed limit

D. No entry

23. You're looking for somewhere to park at night. When may you park on the right-hand side of the road?

A. When you have your sidelights on

B. When you're more than 10 metres (32 feet) from a junction

C. When you're under a lamppost

D. When you're in a one-way street

24. When should you use the right-hand lane of a three-lane dual carriageway?

A. When you're turning right only

B. When you're overtaking only

C. When you're overtaking or turning right

D. When you're using cruise control

25. You're approaching a busy junction. What should you do when, at the last moment, you realise you're in the wrong lane?

A. Continue in that lane

B. Use arm signals to help you change lane

C. Stop until the area has cleared

D. Force your way into the lane you need

26. Where may you overtake on a one-way street?

A. Only on the left-hand side

B. On either the right or the left

C. Only on the right-hand side

D. Overtaking isn't allowed

27. What signal should you give when you're going straight ahead at a roundabout?

A. Signal left when you're approaching the roundabout

B. Signal left before leaving the roundabout

C. Don't signal at any time

D. Signal right when you're approaching the roundabout

28. Which vehicle might have to take a different course from normal at a roundabout?

A. Van

B. Long vehicle

C. Estate car

D. Sports car

29. When may you enter a box junction?

A. When there are fewer than two vehicles ahead

B. When signalled by another road user

C. When your exit road is clear

D. When traffic signs direct you

30. When may you stop and wait in a box junction?

A. When you're on a roundabout

B. When oncoming traffic prevents you from turning right

C. When you're in a queue of traffic turning left

D. When you're in a queue of traffic going ahead

31. Who is authorised to signal you to stop?

A. A police officer

B. A motorcyclist

C. A pedestrian

D. A bus driver

32. What should you do if you see a pedestrian waiting at a zebra crossing?

A. Be ready to slow down or stop to let them cross

B. Go on quickly before they step onto the crossing

C. Stop before you reach the zigzag lines and let them cross

D. Ignore them as they're still on the pavement

33. Which road users benefit from toucan crossings?

A. Bus and lorry drivers

B. Car drivers and motorcyclists

C. Cyclists and pedestrians

D. Tram and train drivers

34. You’re waiting at a pelican crossing. What does it mean when the red light changes to flashing amber?

A. Move off immediately without any hesitation

B. Get ready and go when the continuous amber light shows

C. Wait for the green light before moving off

D. Give way to pedestrians on the crossing

35. You see these double white lines along the centre of the road. When may you park on the left?

A. During daylight hours only

B. If the line nearest to you is broken

C. When there are no yellow lines

D. To pick up or set down passengers

36. You're turning right at a crossroads. An oncoming driver is also turning right. What's the advantage of turning behind the oncoming vehicle?

A. You'll have more time to turn

B. You'll have a clearer view of any approaching traffic

C. You'll use less fuel because you can stay in a higher gear

D. You'll be able to turn without stopping

37. You're travelling along a residential street. There are parked vehicles on the left-hand side. Why should you keep your speed down?

A. Children may run out from between the vehicles

B. So that oncoming traffic can see you more clearly

C. You may set off car alarms

D. There may be delivery lorries on the street

38. What should you do when there's an obstruction on your side of the road?

A. Accelerate to get past first

B. Carry on, as you have priority

C. Give way to oncoming traffic

D. Wave oncoming vehicles through

39. When would you use the right-hand lane of a two-lane dual carriageway?

A. When you're passing a side road on the left

B. When you're travelling at a constant high speed

C. When you're staying at the minimum allowed speed

D. When you're turning right or overtaking

40. Who has priority at an unmarked crossroads?

A. The faster vehicle

B. No-one has priority

C. The larger vehicle

D. The smaller vehicle

41. What's the nearest you may park to a junction?

A. 12 metres (39 feet)

B. 10 metres (32 feet)

C. 15 metres (49 feet)

D. 20 metres (66 feet)

42. You're looking for somewhere to safely park your vehicle. Where would you choose to park?

A. At or near a bus stop

B. On the approach to a level crossing

C. Near the brow of a hill

D. In a designated parking space

43. You're waiting at a level crossing. What must you do if a train passes but the lights keep flashing?

A. Carry on waiting

B. Park and investigate

C. Edge over the stop line and look for trains

D. Phone the signal operator

44. What does this sign mean?

A. End of controlled parking zone

B. No through road

C. End of traffic-calming zone

D. Free-parking zone ends

45. What must you do if you come across roadworks that have a temporary speed limit displayed?

A. Obey the limit, but only during rush hour

B. Ignore the displayed limit

C. Use your own judgement; the limit is only advisory

D. Obey the speed limit

46. You're in a built-up area at night and the road is well lit. Why should you use dipped headlights?

A. So that you can see further along the road

B. So that you can go at a much faster speed

C. So that you can switch to main beam quickly

D. So that you can be easily seen by others

47. You're turning right onto a dual carriageway. What should you do if the central reservation is too narrow to contain your vehicle?

A. Emerge slightly to show your intentions

B. Stop in the first lane so that other vehicles give way

C. Wait until the road is clear in both directions

D. Proceed to the central reservation and wait

48. What's the national speed limit on a single carriageway road for cars and motorcycles?

A. 60 mph

B. 30 mph

C. 50 mph

D. 70 mph

49. What should you do when you park at night on a road that has a 40 mph speed limit?

A. Park facing the traffic

B. Leave parking lights switched on

C. Leave dipped headlights switched on

D. Park near a street light

50. Where will you see these red and white markers?

A. Approaching the end of a motorway

B. Approaching a concealed level crossing

C. Approaching a concealed speed-limit sign

D. Approaching the end of a dual carriageway

51. You're travelling on a motorway in England. When must you stop your vehicle?

A. When signalled to stop by a driver who has broken down

B. When signalled to stop by a pedestrian on the hard shoulder

C. When signalled to stop by a roadworks supervisor

D. When signalled to stop by a traffic officer

52. How should you signal if you're going straight ahead at a roundabout?

A. Signal right on the approach and then left to leave the roundabout

B. Signal left after you leave the roundabout and enter the new road

C. Signal right on the approach to the roundabout and keep the signal on

D. Signal left just after you pass the exit before the one you're going to take

Answers

1. A - To check for cyclists

When riding slowly, you must remember to look out for cyclists - they can travel quickly and fit through surprisingly narrow spaces. Before you turn left in slow-moving traffic, it's important to check that a cyclist isn't trying to filter past on your left.

2. B - Tram lane

Always plan ahead and be aware of lanes and areas designated for specific road users only. The restrictions are sometimes in force only at certain times of day, and signs will show when they apply. In some towns, motorcycles are permitted to use bus lanes – check the signs carefully.

3. A - Parking for solo motorcycles

In some towns and cities there are special areas reserved for parking motorcycles. Look out for these signs.

4. D - Use mirrors and shoulder checks

Before changing direction, as well as using your mirrors, you may need to take a quick sideways glance to check for vehicles in your blind spots. These are the areas behind and to the side of you that aren't covered by your mirrors.

5. B - Wait for a regular parking space to become free

It's illegal to park in a space reserved for disabled users unless you're permitted to do so. These spaces are provided for people with limited mobility, who may need extra space to get in and out of their vehicle.

6. A - Pull into a passing place on your left

If you meet another vehicle on a narrow road and the passing place is on your left, pull into it. If the passing place is on your right, wait opposite it.

7. D - So you can see approaching traffic

When turning right at this crossroads, keeping the oncoming car to your right will give you a clear view of the road ahead.

8. B - Watch for vehicles emerging from side roads

Other road users may not expect or look for motorcycles filtering through slow-moving or stationary traffic. Your view will be reduced by the vehicles around you. Watch out for pedestrians walking between the vehicles, vehicles changing direction and vehicles turning into or out of side roads.

9. A - Wait for the green light

You must obey all traffic signs and signals. Just because the lights are temporary, it doesn't mean that you can disregard them.

10. C - Headlight deflectors

When abroad and riding on the right, deflectors are usually required to prevent your headlights from dazzling approaching drivers.

11. C - 125 cc

Towing a trailer requires special care. You must obey the restrictions that apply when towing - including the 125 cc minimum size of your motorcycle engine and the reduced national speed limits. Don't forget the trailer is there, especially when negotiating bends and junctions.

12. C - 60 mph

You don't have to ride at the speed limit. Use your own judgement and ride at a speed that suits the prevailing road, weather and traffic conditions.

13. D - When signalled to do so by a police officer

Don't stop or hold up traffic unnecessarily. However, there are occasions when you must stop by law. These include * when signalled to do so by a school crossing patrol, police officer or traffic officer * at a red traffic light * at a junction with a 'stop' sign.

14. A - National speed limit applies

This sign doesn't tell you the speed limit in figures. You should know the speed limit for the type of road that you're on and the type of vehicle that you're driving or riding. Study your copy of The Highway Code.

15. B - 70 mph

Make sure that you know the speed limit for the road that you're on. The speed limit on a dual carriageway or motorway is 70 mph for cars and motorcycles, unless signs indicate otherwise. The speed limits for different types of vehicle are listed in The Highway Code.

16. B - By street lighting

In England, Scotland and Northern Ireland, there's a 30 mph speed limit where there are street lights unless signs show another limit. In Wales street lights indicate the limit is 20 mph unless signs show otherwise.

17. B - 30 mph

In England, Scotland and Northern Ireland the presence of street lights generally indicates that there's a 30 mph speed limit, unless signs tell you otherwise. In Wales street lights indicate a 20 mph limit unless signs show otherwise.

18. D - End of minimum speed

The red slash through the sign indicates that the restriction has ended. In this case, the restriction was a minimum speed limit of 30 mph.

19. A - Stay behind it if you're in any doubt

Following a tractor can be frustrating, but never overtake if you’re unsure whether it’s safe. Ask yourself: 'Can I see far enough down the road to ensure that I can complete the manoeuvre safely?' It's better to be delayed for a minute or two than to take a chance that may cause a collision.

20. D - Long vehicle

Long vehicles might have to take a slightly different position when approaching the roundabout or going around it. This is to stop the rear of the vehicle cutting in and mounting the kerb.

21. B - Never

Clearways are in place so that traffic can flow without the obstruction of parked vehicles. Just one parked vehicle can cause an obstruction for all other traffic. You mustn't stop where a clearway is in force, not even to pick up or set down passengers.

22. A - Waiting restrictions

This sign indicates that there are waiting restrictions. It's normally accompanied by details of when the restrictions are in force. Details of most signs in common use are shown in The Highway Code. For more comprehensive coverage, see Know Your Traffic Signs.

23. D - When you're in a one-way street

Red rear reflectors show up when headlights shine on them. These are useful when you're parked at night, but they'll only reflect if you park in the same direction as the traffic flow. Normally you should park on the left, but in a one-way street you may also park on the right-hand side of the road.

24. C - When you're overtaking or turning right

You should normally use the left-hand lane on any dual carriageway unless you're overtaking or turning right. When overtaking on a dual carriageway, look for vehicles ahead that are turning right. They may be slowing or stopped. You need to see them in good time so that you can take appropriate action.

25. A - Continue in that lane

There are times when road markings are obscured by queuing traffic, or you're unsure which lane to use. If, at the last moment, you find you're in the wrong lane, don’t cut across or bully other drivers to let you in. Follow the lane you’re in and find somewhere safe to turn around and rejoin your route.

26. B - On either the right or the left

You can overtake other traffic on either side when travelling in a one-way street. Make full use of your mirrors and ensure it's clear all around before you attempt to overtake. Look for signs and road markings, and use the most suitable lane for your destination.

27. B - Signal left before leaving the roundabout

When going straight ahead at a roundabout, don’t signal as you approach it. Signal left just after passing the exit before the one you wish to take.

28. B - Long vehicle

A long vehicle may have to straddle lanes either on or approaching a roundabout so that the rear wheels don’t mount the kerb. If you’re following a long vehicle, stay well back and give it plenty of room.

29. C - When your exit road is clear

Yellow box junctions are marked on the road to prevent the road becoming blocked. Don’t enter the box unless your exit road is clear. You may wait in the box if you want to turn right and your exit road is clear but oncoming traffic or other vehicles waiting to turn right are preventing you from making the turn.

30. B - When oncoming traffic prevents you from turning right

The purpose of yellow box markings is to keep junctions clear of queuing traffic. You may only wait in the marked area when you’re turning right and your exit lane is clear but you can’t complete the turn because of oncoming traffic or other traffic waiting to turn right.

31. A - A police officer

You must obey signals to stop given by police and traffic officers, traffic wardens and school crossing patrols. Failure to do so is an offence and could lead to prosecution.

32. A - Be ready to slow down or stop to let them cross

By standing on the pavement, the pedestrian is showing an intention to cross. By looking well ahead, you'll give yourself time to see the pedestrian, check your mirrors and respond safely.

33. C - Cyclists and pedestrians

Toucan crossings are similar to pelican crossings but there's no flashing amber phase. Cyclists share the crossing with pedestrians and are allowed to cycle across when the green cycle symbol is shown.

34. D - Give way to pedestrians on the crossing

This light allows pedestrians already on the crossing to get to the other side in their own time, without being rushed. Don’t rev your engine or start to move off while they’re still crossing.

35. D - To pick up or set down passengers

You mustn't park or stop on a road marked with double white lines (even where one of the lines is broken) except to pick up or set down passengers.

36. B - You'll have a clearer view of any approaching traffic

When turning right at a crossroads where oncoming traffic is also turning right, it's generally safer to turn behind the approaching vehicle. This allows you a clear view of approaching traffic and is called 'turning offside to offside'. However, some junctions, usually controlled by traffic-light filters - are marked for vehicles to turn nearside to nearside.

37. A - Children may run out from between the vehicles

Travel slowly and carefully near parked vehicles. Beware of • vehicles pulling out, especially bicycles and motorcycles • pedestrians, especially children, who may run out from between cars • drivers opening their doors.

38. C - Give way to oncoming traffic

Take care if you have to pass an obstruction, such as a parked vehicle, on your side of the road. Give way to oncoming traffic if there isn’t enough room for you both to continue safely.

39. D - When you're turning right or overtaking

Normally you should travel in the left-hand lane and only use the right-hand lane for overtaking or turning right. Move back into the left lane as soon as it’s safe but don’t cut in across the path of the vehicle you’ve just passed.

40. B - No-one has priority

Practise good observation in all directions before you emerge or make a turn. Proceed only when you're sure it's safe to do so.

41. B - 10 metres (32 feet)

Don't park within 10 metres (32 feet) of a junction (unless in an authorised parking place). This is to allow drivers emerging from, or turning into, the junction a clear view of the road they're joining. It also allows them to see hazards such as pedestrians or cyclists at the junction.

42. D - In a designated parking space

It may be tempting to park where you shouldn’t while you run a quick errand. Careless parking is a selfish act and could endanger other road users.

43. A - Carry on waiting

If the lights at a level crossing keep flashing after a train has passed, you should continue to wait, because another train might be coming. Time seems to pass slowly when you’re held up in a queue. Be patient and wait until the lights stop flashing.

44. A - End of controlled parking zone

This sign shows that you're leaving a controlled parking zone and those restrictions no longer apply.

45. D - Obey the speed limit

Where there are extra hazards, such as at roadworks, it’s often necessary to slow traffic by imposing a lower speed limit. These speed limits aren’t advisory; they must be obeyed.

46. D - So that you can be easily seen by others

You may be difficult to see when you’re travelling at night, even on a well-lit road. If you use dipped headlights rather than sidelights, other road users should be able to see you more easily.

47. C - Wait until the road is clear in both directions

When the central reservation is narrow, it may not be able to contain your vehicle. In this case, you should treat a dual carriageway as one road. Wait until the road is clear in both directions before emerging to turn right. If you try to treat it as two separate roads and wait in the middle, your vehicle will stick out and cause an obstruction that may lead to a collision.

48. A - 60 mph

Exceeding the speed limit is dangerous and can result in you receiving penalty points on your licence. It isn't worth it. You should know the speed limit for the road that you're on by observing the road signs. Different speed limits apply if you're towing a trailer.

49. B - Leave parking lights switched on

You must use parking lights when parking at night on a road or in a lay-by on a road with a speed limit greater than 30 mph. You must also park in the direction of the traffic flow and not close to a junction.

50. B - Approaching a concealed level crossing

If there's a bend just before a level crossing, you may not be able to see the level-crossing barriers or waiting traffic. These signs give you an early warning that you may find these hazards just around the bend.

51. D - When signalled to stop by a traffic officer

You'll find traffic officers on motorways and some primary routes in England and Wales. They work in partnership with the police, helping to keep traffic moving and helping to make your journey as safe as possible. It's an offence not to comply with the directions given by a traffic officer.

52. D - Signal left just after you pass the exit before the one you're going to take

To go straight ahead at a roundabout, you should normally approach in the left-hand lane, but check the road markings. At some roundabouts, the left lane on approach is marked ‘left turn only’, so make sure you use the correct lane to go ahead. You won't normally need to signal as you approach, but signal before you leave the roundabout, as other road users need to know your intentions.
